“It is an unforgettable experience, where you arrive believing that you can take advantage of some things, but leave realizing that it was more than you imagined. The IES is in all the details and very generous with us EPs. I don’t get tired of thanking IES for the possibility.”

— 2018 EP attendee
ABOUT THE EP PROGRAM

The IES Emerging Professional (EP) Program is intended for students, recent graduates (up to 5 years after graduation) or professionals making a career change. The program offers career development, networking, and learning opportunities for emerging or new professionals. Every year students and new lighting professionals gather at the EP events held in conjunction with the IES Annual Conference to learn more about the lighting industry, leadership within the IES, and to build valuable relationships to further their lighting careers. The involvement of new professionals mutually benefits students and EPs, as well as the Society as a whole through the exchange of ideas and experiences. This event is possible because of the generous contributions of the EP Sponsors. We invite you to consider supporting the future of the lighting industry this year!

INSTIGATOR
