LM-66-11 ERRATA

If you, as a user of IES LM-66-11, Approved Method for Electrical and Photometric Measurements of Single-Ended Compact Fluorescent Lamps, believe you have located an error not covered by the following revisions, you should e-mail your information to Pat McGillicuddy at: pmcgillicuddy@ies.org or send a letter to: Pat McGillicuddy, Manager of Technology, IES, 120 Wall Street 17th Floor, New York, NY 10005. Additions will be posted to this list online as they become available. This errata list was last updated on August 1, 2011.

Please confine your comments to specific typographical errors or misstatements of fact in the document’s text and/or graphics. Do not attempt general revisions of LM-66-11.

Section 11.2

Note that the first "m" (for the voltage inputs) should be capital, and the second "m" (for the current inputs) should be lower-case.

New Version:
"Voltage inputs of the multifunction meter shall have input impedances greater than 1 MΩ and the current inputs shall have impedances less than 10 mΩ."
